

CHILDREN NEED SMOKE FREE AIR!

The Problem:

Tobacco Smoke Pollution Contains:

Ammonia also in

Cadmium

Carbon Monoxide

Cyanide

Nicotine

Tar

And thousands of other chemicals

Clean products

Batteries

Car exhaust

Gas chamber poison

Insecticide

Asphalt

Inhaling tobacco smoke results in approximately:

- 350,000 ear infections
- 86,000 ear operations (tubes)
- 18,000 tonsillectomy/adenoidectomy surgeries
- 500,000 physician visits for asthma
- 1.67 million physician visits for cough
- 152,000 cases of pneumonia
- 350,000 cases of bronchitis

Joseph R. DiFranza, M.D. Pediatrics, Morbidity and Mortality in Children Associated with the use of Tobacco Products by other People

The risk of an infant dying from Sudden Infant Death Syndrome doubles for children who are taken home to a smoking household.

The Solution:

Choose to protect pregnant women, children, and others you love.

- Ask all smokers to smoke outside your home and car.
- Call for our Smoke-Free Home and Auto Decals
- Call PA FREE Quitline for help to stop smoking: 1-877-724-1090.

Not everyone is ready to choose to stop smoking now, but every smoker can choose to stop smoking around children. TAKE IT OUTSIDE!

If you smoke, think about quitting. We can help. Call 1-888-NO-HABIT.
